Print at 100% (actual size), never "Fit to page".

Check the square: exactly 5 cm wide and 2 in tall. If it is off, the print was scaled and every gauge on the sheet is wrong.

Ring sizer

Lay a ring that fits over the circles. The right size is the circle whose line just touches the INSIDE edge of the ring all the way round. For a finger, cut out the strip below, wrap it snugly where the ring will sit and read the mark.
