print-tools

Print at 100% (actual size), never "Fit to page".

Check the square: exactly 5 cm wide and 2 in tall. If it is off, the print was scaled and every gauge on the sheet is wrong.

Knitting needle and crochet hook gauge

Cut out the holes with a craft knife (a paper punch is too big). The needle that just passes through a hole is that size. Crochet hooks use the same millimetre sizes; US hook letters are shown where they exist.

10 cm × 10 cm tension square

Cut out the window, lay it on your swatch and count the stitches and rows inside it.

Compare with the ball band. More stitches than stated: go up a needle size. Fewer: go down.
