

Printable Ruler

print-tools

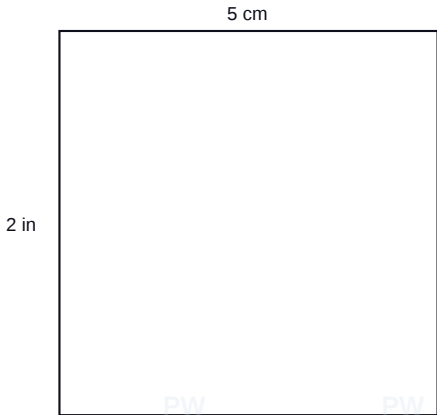

Before you cut: print at 100%

In the print dialog choose "Actual size" or "100%", not "Fit to page" or "Shrink to fit".

Turn off any "scale to fit" or "auto-rotate and centre" option. Plain paper is fine; card is sturdier.

Check the square with a real ruler: it must measure exactly 5 cm on one side and 2 inches on the other.

If it is off by even a millimetre, the print was scaled. Reprint at 100% rather than using the ruler.

Note: a 12 in ruler does not fit this paper size at 100%, so it has been shortened to 8.7 in. Use a larger paper size for the full length.
